

KEL-EMV-Z

Cable assembly with strain relief

Product description

Cable entry, EMC shield and strain relief - all in one location!

Cables pass through the KEL frame and insert then directly to the EMC and strain relief. Simply insert the cable shield into the shield clamp and secure the cable jacket to the strain relief. Two separate functions acc. to regulations - carried out quickly and easily!

Custom configurations are available with shield clamps up to 16 mm - minimal quantities and minimal lead time.

Advantages

- Large surface contact between cable shield and housing/cabinet, especially with conductive coating on treated surfaces
- Sealing by outer cable jacket - EMC shielding by cable shield (in acc. with regulations)
- Combined routing and fastening with the KEL Cable entry system
- Available without SKL shield clamps if only additional strain relief desired

Specification

Material Steel, zinc-plated

Accessories

KEL Cable entry frames Page 6 - 14
 KEL-Quick Cable entry frames Page 32
